Pupil Accommodation Grants

Introduction

The student-focused funding model which was introduced in 1998 consists of three categories: a foundation grant that provides for the core education of every student in Ontario; nine special purpose grants that recognizes the different circumstances faced by students and school boards; and a pupil accommodation grant that pays for the cost of heat, lights, maintenance, renewal, and the construction of new schools.

Pupil accommodation grants are provided on a per-pupil basis and reflect the following principles. School boards are responsible for providing schools and facilities for their students and for operating and maintaining their schools as effectively and efficiently as possible. The provincial government is responsible for providing adequate financial resources and the flexibility to enable boards to meet those responsibilities and for monitoring board actions to ensure accountability to the taxpayers.

School boards that have demonstrated that they are using existing school buildings effectively, and that their enrolment cannot be accommodated without new space are provided with block grants on a per-pupil basis to deal with the cost of constructing, furnishing and equipping new schools and paying for this over time. All school boards receive per-pupil grants to offset the costs of operating (i.e. heating, lighting, cleaning and maintaining), repairing and renovating their schools.

In 1998, the Ministry committed to provide funding in 1998-99, 1999-00 and 2000-01 to cover the servicing costs of loans related to capital projects approved prior to May 15, 1998. This funding will continue.

As at August 31, 2001 approximately $1.091 billion of this debt had been permanently financed through debenture or long term loans with specific schedules for the payment of principal and interest. Grants to cover these payments will be provided until this debt has been retired.

A further $882.8 million of capital related debt has not yet been permanently financed. The Ministry is working with the Ontario Financing Authority to arrange this permanent financing for this debt on a pooled basis. This refinancing is expected to be completed by this Spring. Once this has been done, grants to cover payments to service this debt will be provided until it has been retired.

The purpose of this paper is to provide a description of the formulas used to determine pupil accommodation grants for each board, the implementation of the funding approach, and the accountability framework for the funds provided.

Formula-Based Approach

A board's pupil accommodation grant is calculated using separate formulas to determine grants for school operation (i.e. heating, lighting, cleaning and maintenance), for school renewal (i.e. repairs and renovations) and for new pupil places which reflect the different factors influencing need.

These grants are determined on a per-pupil basis. The formulas used to calculate grant allocations for individual boards differentiate between the traditional elementary and secondary school panels and adult education, specifically:

Total Grant for Pupil Accommodation	=	Grant for New Pupil Places	+	Grant for School Renewal	+	Grant for School Operations		
Grant for New Pupil Places	=	Enrolment in excess of Capacity	×	Benchmark Area Requirement per Pupil	×	Benchmark Construction Cost per Sq. Ft.

		Pupil Places in respect of Enrolment Pressures	×	Benchmark Area Requirement per Pupil	×	Benchmark Construction Cost per Sq. Ft.

		Pupil Places in respect of Capital Transitional Pressure	×	Benchmark Area Requirement per Pupil	×	Benchmark Construction Cost per Sq. Ft.		
				Plus				
		Pupil Places in respect of Prohibitive to Repair	×	Benchmark Area Requirement per Pupil	×	Benchmark Construction Cost per Sq. Ft.		
		The sum of the four components × Geographic Adjustment Factor						
Grant for School Renewal	=	Enrolment	×	Benchmark Area Requirement per Pupil	×	Supplementary School Area Factor	×	Benchmark Renewal Cost per Sq. Ft.

		Top Up Funding for School Renewal *						
				Plus				
		Enhancement to address deferred maintenance needs (allocated to reflect a board's share of the total needs in the system)						
Grant for School Operations	=	Enrolment	×	Benchmark Area Requirement per Pupil	×	Supplementary School Area Factor	×	Benchmark Operating Cost per Sq. Ft.

* Top Up Funding is available for schools that are offering a regular day school program (exclusive of adult day school) and that are operating at less than full capacity.

A Supplementary School Area Factor is applied in the calculation of the Grant for School Operation and the Grant for School Renewal. This factor recognizes unique design features of a board's schools, such as wide hallways, large shop spaces and auditorium space for example, and the additional space needs of boards serving a disproportionate number of students with special needs.

This factor is based on information compiled in the School Facilities Inventory System. Separate factors which reflect the area per pupil place are calculated for elementary and secondary schools. Each board's factors are found in Appendix A.

Funding is also provided for school operations and renewal for schools that are operating at less than full capacity. Top-up funding is calculated on a school-by-school basis for schools offering a regular day-school program (exclusive of adult day-school). This additional funding, which is not to exceed the revenue generated by enrolment equal to 20 percent of school capacity, increases total revenue for school operations and renewal for a school up to the amount that would be generated if the school was operating at full capacity. Appendix B illustrates the calculation of the additional grants for a number of hypothetical schools.

A geographic adjustment factor is applied to the Grants for New Pupil Places in recognition of differences in construction costs across the province (See Appendix C). It is acknowledged that geographic factors will also impact custodial and maintenance costs and the cost to repair and renovate schools. The funding model includes a number of special purpose allocations that address unique circumstances faced by individual boards. In determining the Small Schools Allocation, the Remote and Rural Boards Allocation and the Early Learning Allocation, allowance has been made for custodial and maintenance and facilities renewal costs. Accordingly, no explicit geographic adjustment is being applied to the Grant for School Renewal and the Grant for School Operation.

Grant for New Pupil Places

Generally, only boards whose elementary school enrolment exceeds the capacity of their elementary schools or whose secondary school enrolment exceeds the capacity of their secondary schools will be eligible to receive Grants for New Pupil Places.

Boards are responsible for determining whether or not a school is surplus, and whether or not the surplus property should be leased or sold (See Appendix D). The requirements for disposal of surplus schools are outlined in Ontario Regulation 444/98.

In 1998, detailed information on each school in Ontario was compiled through the School Facilities Inventory System and used to determine the capacity of each board's elementary and secondary schools on a consistent basis across the province.

That analysis was overseen by the Pupil Accommodation Review Committee comprised of Ministry and school board personnel.

Space that was being used to accommodate school-based child care centres as at December 31, 1997 has not been included in the capacity calculations so as not to impact centres currently in operation. Surplus space that may be converted to child care

use after that date, however, will continue to be included in the calculation of the capacity of schools.

Boards have an opportunity to reduce the capacity figures used in the determination of the Grants for New Pupil Places on an ongoing basis. Surplus schools offered at no charge to co-terminous school boards and the Ontario Realty Corporation (ORC) by December 31 of each year and closed before the beginning of the following academic year will be removed from the board's inventory of schools in the calculation of Pupil Accommodation Grants for that following academic year.

Capacity figures will also be reduced upon notification to the Ministry of a board's intention to sell a school in accordance with agreements developed with the Education Improvement Commission regarding the distribution of the assets and liabilities between the English and French components of the old board structure.

Adjustments to a board's capacity may also be made to reflect inter-board transfers of schools. Generally, these adjustments will reflect the rated capacity of the schools in question. The rated capacity of the school given up by December 31 of any year will be removed from the inventory used to calculate Grants for New Pupil Places in the following academic year and the capacity for the school received in return, added to that inventory.

Some boards have indicated that they would be willing to transfer facilities if such transfers created efficiencies for the board; however, they expressed concern about the impact that the capacity of the acquired facilities would have on the calculation of Grants for New Pupil Places, in particular, for schools that may be larger than needed in the short term. The Ministry therefore incorporated an adjustment into the Grant Regulation which is intended to result in more effective use of existing school facilities in the province.

Specifically, the section of the Grant Regulation dealing with the calculation of Grants for New Pupil Places recognizes that the capacity figure for a transferred school will be the lesser of actual enrolment levels (as measured in terms of Average Daily Enrolment) and the rated capacity for the facility provided that prior approval has been obtained from the Ministry and that the transfer meets the following criteria:

- the transfer is consistent with the boards' long term accommodation plan;
- the transfer benefits students from both boards (i.e. through improved facilities; reduced transportation needs, etc.);
- the transfer results in more effective use of existing public assets; and
- the transfer reduces the need for the boards to construct new school facilities in their jurisdictions.

This "floating" capacity, which will apply only for purposes of calculating Grants for New Pupil Places, will remain in effect until such time as enrolment levels in the school reach the rated capacity level for the facility. After that time, the rated capacity for the facility will be used in the determination of the board's grants.

Similar adjustments were introduced in 2001-02 and continue to be available to boards that acquire a facility that has been offered at no cost by another board under the requirements of Ontario Regulation 444/98 provided that the following criteria are met:

- The board has indicated its unconditional desire to accept the school at no cost from the offering board per Ontario Regulation 444/98; and

- The board acquiring a facility at no cost has notified the Ministry of Education, in writing, within thirty days of having expressed an interest in acquiring the facility to the board that offered the facility at no cost. Such notification must demonstrate, to the satisfaction of the Ministry, the following:

    - acquisition is consistent with the board's long term accommodation plan;
    - the acquisition benefits students of the board (i.e., through improved facilities; educed transportation needs, etc.);
    - the acquisition results in more effective use of existing public assets; and
    - the acquisition reduces the need for the board to construct new school facilities in its jurisdiction.

The capacity of the school acquired by December 31 of any year will be added to the inventory used to calculate Grants for New Pupil Places in the following academic year. The capacity figure will be the lesser of actual enrolment levels (as measured in terms of Average Daily Enrolment) and the rated capacity for the facility . This "floating" capacity, which will apply only for purposes of calculating Grants for New Pupil Places, will remain in effect until such time as enrolment levels in the school reach the rated capacity level for the facility. After that time, the rated capacity for the facility will be used in the determination of the board's grants.

Boards also have the option of selling schools which may be surplus to their needs at fair market value, except that the price for the property is not to exceed the value of the Ministry's Grants for New Pupil Places when the purchaser is a coterminous school board, or a Provincial School or publicly funded care and treatment facility offering programs leading to a diploma.

The proceeds from the sale are to be placed in a Pupil Accommodation Reserve. Regulation 446/98 regarding Reserve Funds governs the use of the proceeds of such transactions (see Appendix E).

In 2001-02, a change was built into the funding formula to provide resources to boards that are not eligible for Grants for New Pupil Places to address significant and persistent enrolment pressures at specific schools.

Specifically, a board whose total elementary enrolment is less than the total elementary school capacity will be eligible for funding in recognition of enrolment pressures if data reported in Appendix C of the Financial Statements (Top-Up Funding) indicates that:

- enrolment at any one of its elementary schools has exceeded the capacity of the school by at least 100 pupils in each of the past two years (i.e. 2001-02 and 2002-03); **and**

© QUEEN'S PRINTER FOR ONTARIO © IMPRIMEUR DE LA REINE POUR L'ONTARIO

- there is not sufficient surplus capacity at nearby schools (i.e. within 8 km by road) to accommodate the excess enrolment at the school.

For schools meeting both of these criteria, a number of pupil places equal to the average of the difference between enrolment and capacity at the school in 2001-02 and 2002-03 will be recognized for funding beginning in 2003-04 and will be added to the board's permanent capacity used in the calculation of Grants for New Pupil Places in the current year, i.e., 2003-04. This approach will also be used for subsequent years. This level of funding will be provided for 25 years. These pupil places will be funded in the same manner as for other Grants for New Pupil Places for elementary schools as illustrated below.

Similarly, a board whose total secondary enrolment is less than the total secondary school capacity will be eligible for funding in recognition of enrolment pressures if data reported in Appendix C of the Financial Statements (Top-Up Funding) indicates that:

- enrolment at any one of its secondary schools has exceeded the capacity of the school by at least 100 pupils in each of the past two years (i.e. 2001-02 and 2002-03); **and**
- there is not sufficient surplus capacity at nearby schools (i.e. within 32 km by road) to accommodate the excess enrolment at the school.

For schools meeting both of these criteria, a number of pupil places equal to the average of the difference between enrolment and capacity at the school in 2001-02 and 2002-03 will be recognized for funding beginning in 2003-04 and will be added to the board's permanent capacity used in the calculation of Grants for New Pupil Places in the current year, i.e., 2003-04). This approach will be used for subsequent years. This level of funding will be provided for 25 years. These pupil places will be funded in the same manner as for other Grants for New Pupil Places for secondary schools as illustrated below.

In 2001-02, the formula was also modified to address capital transitional issues for school boards that have enrolment pressures in areas that do not have permanent accommodation. Specific entitlements for individual boards are set out in the Student Focused Funding: Legislative Grants for 2003-04. These pupil places will be funded in the same manner as for other Grants for New Pupil Places as illustrated below. This level of funding will be provided to boards for a period of twenty-five years.

As part of the Provincial Budget tabled in the Legislature on June 17, 2002, the Minister of Finance announced two major commitments which will assist school boards to address renewal needs in their schools. Funding for school renewal was increased by $25 million in 2002-03 to enable school boards to make urgently needed repairs and renovation. For 2003-04, this enhancement was increased by an additional $25 million. This $50 million is being distributed in a way which reflects the Ministry's estimates of school renewal needs for each board based upon information provided through the School Condition Reports of the Accountability Framework for Pupil Accommodation.

The Provincial Budget also announced a new initiative to measure on a consistent basis renewal needs in each school in the province. A two-year program, which began in 2002-03, will involve detailed inspections of each school in the province and the implementation of specialized asset management software in each school board. The

© QUEEN'S PRINTER FOR ONTARIO © IMPRIMEUR DE LA REINE POUR L'ONTARIO

information obtained through this assessment process will provide improved information regarding school condition and the need for specialized teaching spaces required to deliver today's curriculum and will assist in the development of a strategy to address the school renewal issue over the longer term.

In 2002-03 a change was introduced into the funding model to provide resources to boards with facilities deemed prohibitive to repair. For purposes of calculating Grants for New Pupil Places, the capacity of a school identified as prohibitive to repair will be deemed to be zero. A board may be eligible for funding to replace a facility deemed prohibitive to repair.

- If there is insufficient space available in nearby schools (8km by road for elementary schools and 32km by road for secondary schools) to accommodate the students from the school identified as being prohibitive to repair, the number of pupil places recognized for funding will be based on the greater of:
    - The average enrolment at the school over the past two years (2001-02 and 2002-03), **and**
    - 200 pupil places for elementary schools or 500 pupil places for secondary schools

This level of funding will be provided for 25 years. Further, as a result of this funding commitment, the pupil places funded in this manner will be added to the board's permanent capacity used in the determination of Grants for New Pupil Places in the current year (2003-04).

- If there is sufficient space available in nearby schools (8km by road for elementary schools and 32km by road for secondary schools) to accommodate the students from the school identified as being prohibitive to repair, the board's annual funding entitlement to cover the cost to construct replacement facilities will be determined by comparing actual enrolment with the adjusted board-level capacity.

Grants for New Pupil Places are calculated separately for the elementary and secondary school panels using the following formula:

Grant for New Pupil Places	=	Pupil Places in respect of Enrolment in excess of Capacity	×	Benchmark Area Requirement per Pupil	×	Benchmark Construction Cost per Sq. Ft.
				Plus		
		Pupil Places in respect of Enrolment Pressures	×	Benchmark Area Requirement per Pupil	×	Benchmark Construction Cost per Sq. Ft.
				Plus		
		Pupil Places in respect of Capital Transitional Pressure	×	Benchmark Area Requirement per Pupil	×	Benchmark Construction Cost per Sq. Ft.
				Plus		
		Pupil Places in respect of Prohibitive to Repair	×	Benchmark Area Requirement per Pupil	×	Benchmark Construction Cost per Sq. Ft.

To ensure an orderly transition to the funding model as boards begin to address the significant backlog of accommodation issues across the province, annual Grants for New Pupil Places for an individual board have been limited to $20 million for an interim period. This amount of funding will support the construction of 20 elementary schools and 5 secondary schools. Boards may need to phase construction starts over a two or three-year period to effectively manage a capital program of this magnitude.

The $20 million cap will be removed after the board has demonstrated that it has begun construction on projects costing at least $200 million since the introduction of the student focused funding model using the New School Facilities Report component of the accountability framework for the Pupil Accommodation Grant. If the $200 million target has been achieved prior to the start of an academic year, the cap will be removed in that academic year (e.g.: if the target is met prior to September 1, 2003, the cap will be removed for the 2003-04 academic year). The amount that had been withheld from boards which had been impacted by the $20 million cap will be paid over a 25-year period beginning in the academic year in which the cap is removed.

The components used to determine Grants for New Pupil Places are defined in Table 1.

Boards are required to establish Pupil Accommodation Reserve Funds. Grants for New Pupil Places must be deposited in this reserve. Funds in a board's Pupil Accommodation Reserve are to be used solely to address pupil accommodation issues (e.g. to repair or renovate existing schools, or to acquire new facilities to accommodate students) according to the board's own priorities.

Boards are encouraged to take into account cost implications over the life cycle of their schools in making decisions regarding the use of funds in the Pupil Accommodation Reserve. Funds that are not utilized within a fiscal year are to remain in the reserve for use in future years.

Boards have the flexibility to enter into a wide variety of arrangements to acquire new space to accommodate their students. The Pupil Accommodation Reserve fund may be used to:

- meet debenture payments for capital projects (e.g. new schools or additions) which would be owned by the board;
- enter into long- and short-term lease arrangements with the private sector;
- enter into multi-use partnership agreements with other school boards, municipalities or the private sector; or
- provide temporary accommodation for students in areas where enrolment is anticipated to decline in the short to medium term

Staff from the Ministry and the Ontario Financing Authority are available to assist boards to assess proposals involving private sector financing.

Boards receiving funding to address persistent enrolment pressures at specific schools, boards receiving funding in recognition of facilities deemed prohibitive to repair, and boards receiving funding to address capital transitional pressures may use some of the funds in the Pupil Accommodation Reserve to purchase sites. Additionally, a board that requires a school site, needed to address accommodation pressures, may use some of its Pupil Accommodation Reserves to fund the portion or the entire cost of acquiring the site if this cost is not a growth-related net education land cost, within the meaning of Division E of Part IX of the Education Act regarding Education Development Charges. A board may also acquire the new site using proceeds from the sale of surplus properties; savings from its operating budget; or as part of long-term lease or partnership arrangements with municipalities or the private sector.

Sites needed for pupil accommodation arising from new residential development may be acquired with the proceeds from the sale of surplus properties; savings from their operating budgets; as part of long-term lease or partnership arrangements with municipalities or the private sector; or by imposing Education Development Charges (EDCs) provided that they do so in accordance with Division E of Part IX of the Education Act and Ontario Regulation 20/98 (See Appendix G).

Grant for School Renewal

All boards receive Grants for School Renewal. These grants are calculated separately for the traditional elementary and secondary school panels and for adult education using the following formula:

The components used to determine Grants for School Renewal are defined in Table 2.

The following illustrates how the Grant for School Renewal would be calculated for a hypothetical board where the:

- average daily enrolment is:
  - 15,000 pupils in the elementary panel;
  - 6,000 pupils in the secondary panel;
  - 4,000 adults in credit courses provided during the day;

- schools more than 20 years of age in September 1998 account for:
  - 66.7 percent of the area of the board's elementary schools; and
  - 85 percent of the board's secondary schools

- supplementary area factor is:
  - 1.000 in the elementary panel; and
  - 1.028 in the secondary panel

Grant for School Renewal =

(15,000 x 100 x 1.000 x ((.333 x $0.64) + (.667 x $0.96)) +
(6,000 x 130 x 1.028 x ((.150 x $0.64) + (.850 x $0.96)) +
(4,000 x 100 x 1.028 x ((.150 x $0.64) + (.850 x $0.96))

= (15,000 x 100.00 x $0.85) + (6,000 x 133.64 x $0.91) + (4,000 x 102.80 x $0.91)

= $1,275,000 + $729,674 + $374,192

= $2,378,866

Top up funding is calculated on a school by school basis (See Appendix B). If the calculation were to result in Top up funding of $500,000 in the Elementary Panel and $800,000 in the Secondary Panel, then the Total Grant for School Renewal would be:

$2,378,866 + $500,000 + $800,000 = $3,678,866

The Grant for School Renewal is to be deposited into the board's Pupil Accommodation Reserve fund and used for projects according to a board's own priorities. Boards are encouraged to take into account cost implications over the life cycle of their schools in making decisions regarding the use of funds in the Pupil Accommodation Reserve. Funds remaining in the board's Pupil Accommodation Reserve are to be carried forward for use in future years.

Grant for School Operations

All boards receive Grants for School Operations. These grants are calculated separately for the traditional elementary and secondary school panels and for adult education using the following formula:

\+

Top Up Funding for School Operations *

*Top Up Funding is available for schools that are offering a regular day school program (exclusive of adult day school) and that are operating at less than full capacity.

The Benchmark Operating Cost in the Grant for School Operations was increased from $5.20 to $5.35 per square foot during the 2002-03 academic year. Beginning in 2003-04 the School Operations Benchmark will increase again, to $5.44 per square foot as a result of the recommendations of the Education Equality Task Force.

The components used to determine Grants for School Operation are defined in Table 3.

(15,000 x 100 x 1.000 x $5.44) + (6,000 x 130 x 1.028 x $5.44) + (4,000 x 100 x 1.028 x $5.44)

(15,000 x 100.00 x $5.44) + (6,000 x 133.64 x $5.44) + (4,000 x 102.80 x $5.44)

= $8,160,000 + $4,362,010 + $2,236,928

= $14,758,938

Top up funding is calculated on a school by school basis (See Appendix B). If the calculation were to result in Top up funding of $1,500,000 in the Elementary Panel and $2,800,000 in the Secondary Panel, then the Total Grant for School Operation would be:

($14,758,938 + 1,500,000 +2,800,000)

= $19,058,938

This grant is to be used to heat, light, clean and undertake ongoing maintenance of schools. Savings achieved from this grant may be used according to the board's priorities (e.g. augmenting the pupil accommodation reserve; purchasing classroom computers; or purchasing textbooks, software, and other learning materials).

Accountability Framework

On January 7, 2000, the Ministry provided information about the specific reporting requirements of the Accoûntability Framework for Pupil Accommodation for implementation by school boards. This framework is comprised of four key components:

1. an electronic school facilities inventory system to compile key data elements regarding each school;

2. a long term plan to identify issues related to pupil accommodation that boards expect to face and strategies for dealing with those issues;

© QUEEN'S PRINTER FOR ONTARIO © IMPRIMEUR DE LA REINE POUR L'ONTARIO

3. an annual reporting cycle for school operations and renewal to assess operational performance and monitor improvements to the facilities. These reports will provide information on:
    - the condition of buildings;
    - service quality as perceived by the users; and
    - expenditures made to operate, maintain and renovate schools

4. a report for each new school construction project which provides key information regarding project design, schedule, construction costs and financing

Details are provided in the document entitled "Accountability Framework for Pupil Accommodation – Reporting Requirements (December 1999)". A copy of this document is available from the Ministry's file transfer web site at : ftp://ftp.edu.gov.on.ca/sfis/af/.

APPENDIX D

Disposition of Real Property

Ontario Regulation 444/98 governs the disposition of surplus real property. Since its introduction, it has been amended by a separate regulation to give school boards the flexibility to close schools annually. A complete copy of Ontario Regulation 4444/98, as amended, is attached as part of this appendix.

Boards are responsible for determining whether a school is surplus and whether surplus property should be leased or sold. Each board is to have in place a school closure policy. The policy is to contain the following elements:

1. Procedures which will be applied to identify when and how a school will be considered for consolidation;
2. Procedures which will be used to enable citizens who may be concerned over the eneral social and economic effects on the community to make their views known to the board before any decision to consolidate a school;
3. The establishment of a minimum time period between the identification of a school as a candidate for consolidation and the final decision of the board;
4. Requirement for the presentation to the board in public session, of the following reports:

    a. The effects of consolidation on community activities of a social, educational, cultural, or recreational nature which takes place on the school premises;
    b. The effects of consolidation of a specific school on the following:
        - The attendance area defined for that school;
        - Attendance at other schools;
        - The need and extent of busing;
    c. A report and analysis of the implications for the program for students both in the school under consideration for consolidation and in the school(s) where programs may be affected by the school being consolidated;
    d. A report on the financial effects of consolidating or not consolidating the school, including any capital implications;
    e. A report indicating the possible alternative use or disposition of the school, if it is consolidated.

The capacity of surplus schools offered at no charge to co-terminous school boards and the Ontario Realty Corporation (ORC) by December 31 of each year and closed before the beginning of the following academic year will be removed from the board's inventory of schools in the calculation of Pupil Accommodation Grants for that following academic year. To effect this change, the Ministry of Education requires a copy of the letter sent to coterminous boards and the ORC clearly indicating that the school is being offered at no charge.

© QUEEN'S PRINTER FOR ONTARIO © IMPRIMEUR DE LA REINE POUR L'ONTARIO

Written responses to such offers from coterminous boards should be requested, but are not essential. If a board does not respond within the 90 day period specified in the regulation, the offering board may interpret this to be a refusal of the property. **A written response from the ORC, however, is required for all offers**. If the ORC has not formally responded within 90 days, boards are to notify the Business Services Branch of the Ministry of Education for appropriate follow-up action.

If a board accepts a school from another board at no cost, it is to notify the Business Services Branch of the Ministry in writing. The facility that is acquired will be included in the board's inventory in the calculation of Pupil Accommodation Grants for the following academic year. For example, if a board acquired a school that had been offered at no cost by another board during 2000, generally, the rated capacity would be included in the inventory of the recipient board in the calculation of Grants for New Pupil Places in 2001-02. Beginning in 2001-2002 however, boards that acquire a facility that has been offered at no cost by another board under the requirements of Ontario Regulation 444/98 will have the lesser of the enrolment and the capacity of the facility recognized as the capacity of the facility in the calculation of Grants for New Pupil Places provided that the following criteria are met:

- The board has indicated its unconditional desire to accept the school at no cost from the offering board per Ontario Regulation 444/98; and

- The board acquiring a facility at no cost has notified the Ministry of Education, in writing, within thirty days of having expressed an interest in acquiring the facility to the board that offered the facility at no cost. Such notification must demonstrate, to the satisfaction of the Ministry, the following:

    - the acquisition is consistent with the board's long term accommodation plan;
    - the acquisition benefits students of the board (i.e., through improved facilities; reduced transportation needs, etc.);
    - the acquisition results in more effective use of existing public assets; and
    - the acquisition reduces the need for the board to construct new school facilities in its jurisdiction.

The capacity of the school acquired by December 31 of any year will be added to the inventory used to calculate Grants for New Pupil Places in the following academic year. The capacity figure will be the lesser of actual enrolment levels (as measured in terms of Average Daily Enrolment) and the rated capacity for the facility . This "floating" capacity, which will apply only for purposes of calculating Grants for New Pupil Places, will remain in effect until such time as enrolment levels in the school reach the rated capacity level for the facility. After that time, the rated capacity for the facility will be used in the determination of the board's grants.

Capacity adjustments will also be made if documentation provided indicates that the schools are being sold in accordance with agreements developed with the Education Improvement Commission regarding the distribution of the assets and liabilities between the English and French components of the old board structure.

Boards will also have the option of selling schools which may be surplus to their needs at fair market value, except that the price for the property is not to exceed the value of

the Ministry's Grants for New Pupil Places when the purchaser is a coterminous school board, or a Provincial School or publicly funded care and treatment facility offering programs leading to a diploma.

The proceeds from the sale are to be placed in a Pupil Accommodation Reserve. Regulation 446/98 regarding Reserve Funds governs the use of the proceeds of such transactions (see Appendix E).

Except for dispositions for purposes of provision of municipal hard services, dispositions of real property will be subject to a requirement that the property first be offered to other public sector bodies before it is offered on the open market. Regulation 444/98 specifies a priority order and processes to be followed.

The Regulation also specifies processes which are to be followed in the event that there is a disagreement regarding the price of the property. Should no agreement be reached with any of the public sector bodies given priority, the board may then lease, sell or otherwise dispose of the property at fair market value to any other person or organization.

Prior to disposing of a property at fair market value to any other body or person not listed in Ontario Regulation 444/98, a board is required under Section 12 of the regulation to provide evidence satisfactory to the Minister that it had offered the property to the bodies listed in the regulation and that no offer was received by the board.

A letter from a senior member of the school board to the Director of the Business Services Branch of the Ministry of Education certifying the above to be true is to be forwarded prior to the board offering the property on the open market. The ministry's response to such a letter is required.

Boards are to inform the Business Services Branch of the Ministry of Education of any offers and acceptances resulting from sales at Fair Market Value in order that the information on the School Facilities Inventory System may be adjusted to reflect the transactions.

Pupil Accommodation Reserves

School boards are to place their Grants for School Renewal and New Pupil Places into a Pupil Accommodation Allocation Reserve Fund. The funds are to be used only for the purposes stated in Ontario Regulation 446/98 regarding Reserve Funds. These amendments have been consolidated into Ontario Regulation 446/98, as amended, which is attached as part of this appendix.

Boards are also required to place all proceeds of sales, leases and other dispositions of real property into a Proceeds of Dispositions Reserve Fund. The funds are to be used only for the purposes stated and in the manner described in the Regulation.

Any board that sells, leases or disposes of real property that was previously acquired with funds withdrawn from an Education Development Charges account or reserve fund, and that was not previously used for pupil accommodation, are to place the proceeds from the sale into an Education Development Charge Reserve Fund as described in the Regulation.

Interest earned as a result of the investment of funds from any of these reserves is to be credited to the appropriate reserve.

APPENDIX F

Calculation of a Board's Grant for New Pupil Places

The purpose of this section is to illustrate how the calculations of a board's Grants for New Pupil Places would be made.

Assumptions:

The calculations are based on a hypothetical board. Two examples are provided where the following assumptions have been made:

1. **Existing Elementary Schools**

   - in September 1998, the capacity of the board's existing elementary schools is assumed to be 23,000 pupil places. In the first example, this capacity remains the same for 25 years. In the second, the capacity is assumed to decrease by 500 pupil places in 2000-01.

2. **Existing Secondary Schools**

   - in September 1998, the capacity of the board's existing secondary schools is assumed to be 7,000 pupil places. In the first example, this capacity remains the same for 25 years. In the second, the capacity is assumed to decrease by 1000 pupil places in 2001-02.

3. **Elementary School Enrolment**

   - Average Daily Enrolment for day-school elementary school pupils is assumed to:
     - Be 25,000 in 1998-99;
     - Grow by 500 pupils annually until 2003-04;
     - Remain stable at 27,500 pupils until 2013-14;
     - Decline by 250 pupils annually, reaching 24,000 pupils in 2027-28

4. **Secondary School Enrolment**

   - Average Daily Enrolment for day-school secondary school pupils that were under 21 years of age is assumed to:
     - Be 8,000 in 1998-99;
     - Grow by 200 pupils annually until 2008-09;
     - Remain stable at 10,000 pupils until 2023-24;
     - Decline by 250 pupils annually, reaching 9,000 pupils in 2027-28

5. **Benchmark Area Requirement per Pupil**

   - The Benchmark Area Requirement per Pupil for the elementary panel is assumed to be 100 square feet for the entire time period;
   - The Benchmark Area Requirement per Pupil for the secondary panel is assumed to be 130 square feet for the entire time period

© QUEEN'S PRINTER FOR ONTARIO © IMPRIMEUR DE LA REINE POUR L'ONTARIO

6. Benchmark Construction Cost per Square Foot

- The Benchmark Construction Cost per Square Foot, amortized over a 25 year period, is $11.00 for elementary schools; and
- The Benchmark Construction Cost per Square Foot, amortized over a 25 year period, is $12.00 for secondary schools

7. Geographic Adjustment Factor

- The Geographic Adjustment Factor for this hypothetical board is assumed to be 1.100.

Grants for New Pupil Places

Grants for New Pupil Places are calculated separately for the elementary and secondary school panels using the following formula:

Grant for New Pupil Places	=	Pupil Places in respect of Enrolment in excess of Capacity	×	Benchmark Area Requirement per Pupil	×	Benchmark Construction Cost per Sq. Ft.
				Plus		
		Pupil Places in respect of Enrolment Pressures	×	Benchmark Area Requirement per Pupil	×	Benchmark Construction Cost per Sq. Ft.
				Plus

The sum of the four components Geographic × Adjustment Factor

Table F-1 illustrates the calculation of the Grants for New Pupil Places for the elementary and secondary panels for the hypothetical board that does not receive amounts for enrolment pressures or transitional capital adjustments used in this example. As may be seen:

- for the first 25 years (i.e for the duration of the amortization period) the capacity of the board's schools is assumed to be unchanged from the capacity in September 1998. Over the 25-year period, therefore, the board would have received sufficient funding to pay for the construction of new facilities to house all of its 1998-99 student body.

- actual 1998-99 enrolment levels, therefore, are used as the capacity deducted from enrolment in 2023-24, the first year after the amortization period, to determine grants for new pupil places in that year

© QUEEN'S PRINTER FOR ONTARIO © IMPRIMEUR DE LA REINE POUR L'ONTARIO

- similarly, actual 1999-00 enrolment levels are used as the capacity deducted from enrolment in 2024-25 to determine grants for new pupil places in that year; and so on;

- if this capacity exceeds enrolment, the difference between the two is assumed to be zero.

The Grant for New Pupil Places for the board is obtained by adding the grants calculated for the elementary and secondary panels in Table F-1.

Table F-2 illustrates the calculation of the Grants for New Pupil Places for the elementary and secondary panels for the same hypothetical board used in this example. The calculation assumes that the board has offered a 500 pupil place elementary school up to its co-terminous boards and the Ontario Realty Corporation at no charge in the 1999 calendar year and a 1000 pupil place secondary school in the 2000 calendar year. As may be seen:

- the board's decision to offer up the elementary school at no charge during 1999 is reflected in the calculation of Grants for New Pupil Places effective 2000-01;

- the capacity figures used to determine Grants for New Pupil Places for the elementary panel as per the example shown in Table F-1 are therefore reduced by 500 pupil places for the 25-year period 2000-01 to 2024-25 inclusive.

- similarly, the board's decision to offer up the secondary school at no charge during 2000 is reflected in the calculation of Grants for New Pupil Places effective 2001-02;

- the capacity figures used to determine Grants for New Pupil Places for the secondary panel as per the example shown in Table F-1 are therefore reduced by 1000 pupil places for the 25-year period 2001-02 to 2025-26 inclusive.

The Grant for New Pupil Places for the board is obtained by adding the grants calculated for the elementary and secondary panels in Table F-2.

Funding will be provided to address elementary or secondary enrolment pressures for boards not eligible for Grants for New Pupil Places at either the elementary or secondary levels or to address capital transitional pressures. The Capital Transitional amounts have been specified in the 2003-04 Grant Regulation. The Enrolment Pressures amounts will be confirmed by the ministry during the 2003-04 academic year.

APPENDIX G

Education Development Charges

School boards are provided with general authority to impose Education Development Charges (EDCs) in Division E of Part IX of the Education Act. Ontario Regulation 20/98 documents the details regarding eligibility to impose EDCs on new development and the determination of the charges themselves. Since its introduction, Ontario Regulation 20/98, has been amended by separate regulations on four occasions[2]. These amendments have been consolidated into Ontario Regulation 20/98, as amended, which is attached as part of this appendix.

In March 2003, Ontario Regulation 20/98 was further amended to update references to municipalities to reflect amendments made to the *Municipal Act* in January, 2003. A copy of that amendment is also attached as part of this appendix.

Regulation 20/98 provides that EDCs may be collected on new residential and non-residential development and are to be used only to acquire new school sites needed to accommodate students resulting from new residential development in the board's jurisdiction and in the area in which the funds are collected. Generally, EDC by-laws may be imposed only in upper tier municipalities or prescribed regions in which the board intends to construct new schools. A board may have one EDC by-law covering the entire region prescribed in the Regulation; or it may have separate by-laws for different areas within a prescribed region.

---

[2] Prior to 2003, Ontario Regulation 20/98 was amended as follows:

Year of Amendment	Purpose of Amendment to Ontario Regulation 20/98
1998	To ensure that proceeds from the sale of vacant land (i.e., land on which the board had not as yet built any permanent facilities) which had been acquired using revenues from Education Development Charges are to be placed into an Education Development Charge Reserve Fund in accordance with processes set out in Ontario Regulation 446/98.
1998	To authorize boards that collected EDCs under the authority of Part III of the Development Charges Act as it read prior to February 1, 1998, to utilize surplus funds in their EDC accounts to acquire sites for new schools.
2000	To permit boards to transfer funds from their Education Development Charge Reserve Fund to their Pupil Accommodation Reserve Fund provided that: i. they do not have in place an Education Development Charge by-law prepared in accordance with Ontario Regulation 20/98; and ii. funds transferred from the Education Development Charge Reserve Fund to the Pupil Accommodation Reserve Fund are used for the provision of new pupil places needed as a result of new residential development in the area in which the funds were raised.
2002	Amended in response to recommendations made through a consultative process involving school boards and their representatives, and representatives from the development industry that took place in 2001.

The maximum term of an EDC by law is five years. Generally, boards where the average of elementary (or secondary) school enrolment projected during the proposed by-law period exceeds the capacity of their elementary (or secondary) schools are eligible to impose EDCs. Co-terminous boards are encouraged to work with each other and with the municipalities within their jurisdictions in developing EDC by-laws.

Before imposing EDCs a board is required to prepare a background study which documents:

- Information regarding current capacity and enrolment of each of the board's elementary and secondary schools
- Projections of total elementary and secondary enrolment for the board for a fifteen-year period. A fifteen-year planning horizon is used rather than the five year maximum period for the proposed EDC by-law to:
    - Take into account both elementary and secondary school requirements which would be generated by the proposed development; and
    - Smooth fluctuations in EDC values over time
- Projections of residential housing starts, and projections of the number of elementary and secondary students expected to attend the board's schools as a result of this development
- The board's plans for new schools to accommodate the projected enrolment increases
- The land required for each of the proposed schools and the projected cost to acquire this land
- The calculations of unit charges for both residential and non-residential development

The background study will be reviewed by the Ministry of Education to ensure that the eligibility criteria have been met and to approve the board's estimates of the projected enrolment increases resulting from the anticipated development in the area and the number of new school sites required to accommodate this enrolment.

A board is required to hold at least one public meeting to discuss the rationale for the proposed EDC by-law and to document the calculation of unit charges. Appeals related to EDC by-laws imposed by the board will be resolved by the Ontario Municipal Board.

EDC charges will be collected by municipalities when building permits are issued, and funds forwarded to boards on a monthly basis. Each year, boards will be required to submit to the Ministry of Education financial reports documenting:

- The initial balance of the EDC account;
- All revenues deposited into the EDC account, including interest earned;
- All expenditures made from the EDC account, including:
    - The cost of land for new school sites;
    - The cost to service the sites acquired;
    - The cost of site development required to prepare the sites for construction;
    - The interest costs associated with loans associated with the acquisition of sites funded from the EDC account; and

© QUEEN'S PRINTER FOR ONTARIO © IMPRIMEUR DE LA REINE POUR L'ONTARIO

- The closing balance of the EDC account.

The Ministry has published EDC Guidelines that provide an overview of the procedures for the calculation, imposition, and use of EDCs, and general clarification to school boards and those involved in the preparation of EDC background studies. These guidelines are available from the Ministry's website at www.edu.gov.on.ca, or at the Ministry's FTP site, along with revised Ministry forms and related legislation at ftp://ftp.edu.gov.on.ca/sfis/edc.

(b) to allow the facilities for pupil accommodation that the board intends to provide on the site to be located there and to provide access to those facilities. O. Reg. 20/98, s. 2 (3).

(4) This section does not apply to land,

(a) that has already been acquired by the board before February 1, 1998; or

(b) in respect of which there is an agreement, entered into before February 1, 1998, under which the board is required to, or has an option to, purchase the land. O. Reg. 20/98, s. 2 (4).

PART III
DETERMINATION OF CHARGES AND PASSAGE OF BY-LAW

DETERMINATION OF EDUCATION DEVELOPMENT CHARGES

7. Before an education development charge by-law is passed, the board shall do the following for the purposes of determining the education development charges:

1. The board shall estimate the number of new dwelling units in the area in which the charges are to be imposed for each of the 15 years immediately following the day the board intends to have the by-law come into force. The board's estimate shall include only new dwelling units in respect of which education development charges may be imposed.
2. The board shall identify different types of new dwelling units and estimate, for each type, the average number of new elementary school pupils and the average number of new secondary school pupils generated by each new dwelling unit who will attend schools of the board.
3. For each of the 15 years referred to in paragraph 1, the board shall estimate the total number of new elementary school pupils and new secondary school pupils using the estimated number of new dwelling units and the estimated average number of new pupils generated by each new dwelling unit subject to the following adjustments,
    i. the board shall reduce the number of new elementary school pupils by the number of existing elementary school pupil places that, in the opinion of the board, could reasonably be used to accommodate those new pupils,
    ii. the board shall reduce the number of new secondary school pupils by the number of existing secondary school pupil places that, in the opinion of the board, could reasonably be used to accommodate those new pupils.
4. The board shall estimate the net education land cost for the elementary school sites and secondary school sites required to provide pupil places for the new elementary school pupils and new secondary school pupils.
5. The board shall estimate the balance of the education development charge reserve fund, if any, relating to the area in which the charges are to be imposed. The estimate shall be an estimate of the balance immediately before the day the board intends to have the by-law come into force.
6. The board shall adjust the net education land cost with respect to any balance estimated under paragraph 5. If the balance is positive, the balance shall be subtracted from the cost. If the balance is negative, the balance shall be converted to a positive number and added to the cost.
7. The net education land cost as adjusted, if necessary, under paragraph 6, is the growth-related net education land cost.
8. The board shall choose the percentage of the growth-related net education land cost that is to be funded by charges on residential development and the percentage, if any, that is to be funded by charges on non-residential development. The percentage that is to be funded by charges on non-residential development shall not exceed 40 per cent.
9. The board shall determine the charges on residential development subject to the following,
    i. the charges shall be expressed as a rate per new dwelling unit,
    ii. the rate shall be the same throughout the area in which charges are to be imposed under the by-law,
    iii. the rate shall be an amount determined by the board so that if applied, over the 15 year period referred to in paragraph 1, to the estimated residential development in the area to which the by-law would apply and for which charges may be imposed, the percentage of the forecasted growth-related net education land cost that is to be funded by charges on residential development would not be exceeded.

© QUEEN'S PRINTER FOR ONTARIO © IMPRIMEUR DE LA REINE POUR L'ONTARIO

9.1 Despite paragraph 9, if the board intends to impose different charges on different types of residential development, the board shall determine,

i. the percentage of the growth-related net education land cost to be funded by charges on residential development that is to be funded by each type of residential development,

ii. the charges on each type of residential development, subject to the rules in subparagraphs 9 i, ii and iii.

10. If charges are to be imposed on non-residential development, the board shall determine the charges subject to the following,

i. the charges shall be expressed as one of the following types of rate, as selected by the board,

A. a rate to be applied to the board-determined GFA of the development, or

B. a rate to be applied to the declared value of the development,

ii. the board may choose to have one type of rate for some parts of the area in which charges are to be imposed and the other type of rate to apply to the other parts of the area in which charges are to be imposed,

iii. the board may not choose to have both types of rate apply within a city, town, village or township,

iv. if only one type of rate applies under the by-law, the rate shall be the same throughout the area in which charges are to be imposed under the by-law,

v. if both types of rate are to apply under the by-law, each of those rates shall be the same throughout the area in which each type of rate applies,

vi. the rate (or rates if both types of rate are to apply under the by-law) shall be determined by the board so that if applied, over the 15-year period referred to in paragraph 1, to the estimated non-residential development in the area to which the by-law would apply and for which charges may be imposed, the percentage of the forecasted growth-related net education land cost that is to be funded by charges on non-residential development would not be exceeded. O. Reg. 20/98, s. 7; O. Reg. 95/02, s. 4.

APPLICATION OF CHARGE IF BASED ON DECLARED VALUE OF DEVELOPMENT

8. An education development charge expressed as a rate to be applied to the declared value of a development shall be applied to the declared value used to calculate the building permit fee, if that fee is calculated using the declared value of the development. O. Reg. 20/98, s. 8.
